

FACT SHEET

Interactive graphic objects allow you to create professional looking artwork.

Use the text and color panels to create informative multi-page presentations.

The Business Graphics Standard For NeXTstep

Appsoft Draw—the application of choice for professional-looking business graphics. Provides you with an easy-to-use interface, powerful drawing tools, and multi-page capabilities, that will have you creating effective presentations, informative flyers and multi-page newsletters in a flash.

Interactive Graphics Capabilities

Appsoft Draw's comprehensive tool palette offers a host of drawing tools for fast and interactive control of lines, arcs, squares, rectangles, ellipses, circles, polygons, 24-bit color, TIFF and EPS images, beziers and more. All the objects can be drawn with any line width, filled with any shade of gray, gradient, pattern or spot color, and adjusted for transparency. Combine these objects to create stunning artwork—including everything from company organizational charts to business presentations.

Powerful Text Manipulation Tools

Now use Appsoft Draw's text tools to enter and manipulate your text headlines and body copy. Change text fonts, stroke, width, kerning, and justification. Text can also be drawn at any size, at any angle, within objects or along an arbitrary path. All fill and border properties used to define drawing objects can be applied to individual characters. And text can also be interactively rotated to any angle, scaled, reflected, and skewed.

Add Stunning Graphic Effects Instantly

To make it even easier while creating those high impact presentations, Appsoft Draw offers you a variety of drawing effects. Apply everything from three dimensional looking gradient fills, attention getting arrowheads and dashed lines, separate stroke and fill colors, to adjustable brightness and contrast levels of TIFF images. And just like graphical objects, images can be interactively scaled, cropped, rotated, stretched and skewed.

Unlimited Flexibility at an Attractive Price

Once you're finished with your artwork, output to any PostScript printer or imagesetter to create high quality color or black & white prints and slides. And since its all running under NeXTstep, you can be sure that all Appsoft programs provide state of the art compatibility and true work group productivity.

With Appsoft Draw at your fingertips, you'll be producing top-quality forms, illustrations, maps, presentations, slides and more—accurately and automatically. For the business professional, Appsoft Draw removes the tedium between inspiration and presentation.
