Key Features:

- Create multi-page documents quickly and easily.
- Work with multiple documents at once.
- Combine graphics and text to create stunning presentations.
- Support for Display PostScript®
- Multiple levels of Undo and Redo supported.
- Import and Export TIFF, EPS and FrameMaker - Maker Interchange Format (MIF).

Feature List:

Drawing Tools
- Create rectangles, ellipses, arcs, bezier splines, and polyline objects
- Control fill color, pattern and opacity
- Variable line thickness, dash length, pattern, color, opacity and end-cap styles
- Object fills with fully adjustable horizontal, vertical or radial gradients
- Fully adjustable arc start and end angles
- Unlimited line width (including fractional widths)
- Fully interactive or numeric rotate, scale, zoom and skew of any object
- Complete spline editing including move, add or remove points and curvature adjustments
- Objects usable as masking bounderies

Text Manipulation
- Uses NeXT standard PostScript fonts
- Set any font size (including fractional point sizes)
- Outline any font with controllable line thickness, shade and opacity
- Fill and outline text with shades of gray, spot color or patterns
- Mix font sizes, styles, fill or line patterns and opacities on a per character basis
- Place text along any arbitrary path
- Rotate, scale or skew text to any angle
- Independent text and bounding box rotation
- Wrap text paragraphs inside any object boundary

- Individual paragraph alignment and justification within objects
- Automatic and manual kerning
- Output and input text in RTF and ASCII format

Image Editing
- Import and edit 1 bit monochrome, 2 bit, or 8 bit TIFF images
- Set and adjust image cropping
- Adjust image contrast, brightness and gamma (non-linear brightness)
- Adjust image gray levels (posterization)
- Interactively scale, rotate, skew and stretch images
- Full cut, copy and paste support
- Import TIFF images

Page Layout and Printing
- No page size restrictions or limitations
  User definable page borders (cropping and
- bleeding)
- Print registration marks
- NeXT laser printer, color PostScript® printer and image setter support

System Requirements:
- NeXTstep 2.0 or higher
- 8MB of Memory
- Hard Disk
- 3 1/2" Floppy Drive

Registered User Support:
- Technical support from our expert staff during normal business hours.
- Free product updates for 90 days.
- Notice of new software releases.
