

Engage!

by Atherton Software Works

The intelligent NeXTSTEP utility that let's you create your own custom dock for organizing applications and files.

Engage! is a flexible utility program and tool for extending the capabilities of the NeXT Workspace Manager Application Dock. With Engage!, you can create your own multi-level dock for quick, convenient access to your programs and files. Its unique "levels" feature allows users to organize applications as well as files into logical groups or "titled" levels.

Additionally, Engage! allows users to place their custom dock anywhere on the screen. Engage! is the intelligent approach to personalizing your NeXT Workspace for the way you work.

Features include:

- Multi-level dock for launching applications and opening files
- Versatile dock tiles include programs and files as well as folders
- Easy "drag-and-drop" feature for adding and removing dock tiles
- User-defined dock level names for titling groups according to workflow
- Flexible display for positioning dock (right, left, up, down, free form)
- Unique "flip" command feature for displaying hidden dock tiles
- Commands for sorting, searching and inspecting dock tiles in any level
- Preferences command including option for Hide on launch
- Screen saver utility
- Fine tune positioning of Engage! dock using cursor arrow keys

Engage! is a fully compliant NeXTSTEP application with built-in support for international localization. The application currently requires System Software Release 2.0 or higher from NeXT Computer, Inc. Engage! has a suggested retail price of \$99.00. This software product is sold on a per user license basis, and is available NOW! through Paget Press, Inc., 1-800-733-2031. Contact Atherton Software Works for volume purchase agreements.
